

## MF11 FDX-B & MF11 Visual FET Tag

### Product Description

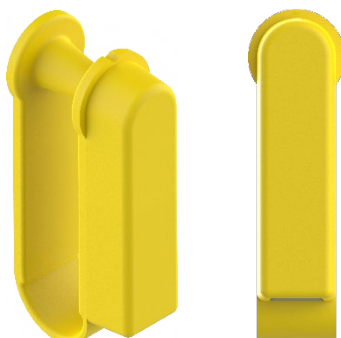

The FET electronic ID or visual ID tag is an excellent, lightweight option to tag lambs, goats, and other small animals for visual identification.

This tag is ideal for official identification programs as well as herd management.

Intended for single use, the tag has a tamperproof closing mechanism. Attempts to open it will cause damage, rendering it unusable.

Tag numbers and barcodes are laser marked to the customer's specifications with a black durable contrast.

Both electronic and visual tags come in a rack of 10 units in a wide range of colours and can be easily applied using the FET Applicator.

### Technical Specifications

Dimension	82 mm x 9 mm
Weight	3.2 g (MF11 FDX-B) 2.2 g (MF11 Visual)
Material	Nylon
Technology	FDX-B
Working Frequency	134.2 kHz
Certifications	ISO 11784/5 (964014) PAS66
Reading Distance	Up to 30 cm with the Tru-Test XRS2 EID Stick Reader Up to 71 cm with the Tru-Test XRP2 Panel Reader & Small Antenna
Applicator	FET Applicator
